Some LogiLink® products contain code which is developed by Third-Party-Companies and which are subject to the GNU General Public License ("GPL") or the GNU Lesser Public Licence ("LGPL"). You can find the license terms under GPL or LGPL.

To download the firmware of LogiLink® products, which contain GPL- or LGPL-Code, please select the product from the archive-area. The GPL- or LGPL-Code used in LogiLink® products is released without warranty and is subject to the copyright of the corresponding author.

For more details, please see the GPL- and LGPL-licences.

Further sourcecodes which are subject to the GPL-licenses, are available upon request. Please contact technik@logilink.info in these matters.

We will make the files available to you on electronic interchange or on a data carrier at your cost price within 4 weeks.

GNU GENERAL PUBLIC LICENSE Version 3, 29 June 2007

Copyright © 2007 Free Software Foundation, Inc. http://fsf.org/ Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

Preamble

The GNU General Public License is a free, copyleft license for software and other kinds of works.

The licenses for most software and other practical works are designed to take away your freedom to share and change the works By contrast, the GNU General Public License is intended to guarantee your freedom to share and change all versions of a program—to make user it remains free software for all is users. We, the Free Software Foundation, use the GNU General Public License for most of our software; at applies also to any other work released this way by its authors. You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Dur General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for them if you wish), that you receive source code or can get it if you want it, that you can charge the software or use pieces of it in new free programs, and that you know you can do these things.

To protect your rights, we need to prevent others from enying you these rights or asking you to surrender the rights. Therefore, you have certain responsibilities if you distribute opies of the software, or if you modify it: responsibilities to respect the freedom of others.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must pass on to the recipients the same freedoms that you received. You must make sure that they, too, received or can get the source code. And you must show them these terms so they know their rights.

Developers that use the GNU GPL protect your rights with two steps: (1) assert copyright on the software, and (2) offer you this License giving you legal permission to copy, distribute and/or modify it.

For the developers' and authors' protection, the GPL clearly explains that there is no warranty for this free software. For both users' and authors' sake, the GPL requires that modified versions be marked as changed, so that their problems will not be attributed erroreputs by authors of rearious versions.

Some devices are designed to deny users access to install or run modified versions of the software inside them, although the manufacture can do so. This is fundamentally incompatible with the aim of protecting users' freedom to change the fundamentally incompatible with the aim of protecting users' freedom to change the software. The systematic pattern of such abuse occurs in the area of products for individuals to use, which is precisely where it is most unacceptable. Therefore, we have designed this version of the GPL to prohibit the practice for those products. If such problems arise substantially in other domains, we stand ready to extend this provision to those, as needed to protect the

Finally, every program is threatened constantly by software patients. States should not allow patients to restrict development and use of software on general-purpose includ computers, but in those that do, we wish to avoid the special danger that patients applied to a free program could make it effectively proprietary. To prevent this, the GPL assures that patients cannot be used to render the program non-the program in the term of the program on the p

The precise terms and conditions for convince distribution and modification follow

TERMS AND CONDITIONS

Definitions.

"This License" refers to version 3 of the GNU General Public License.

"Copyright" also means copyright-like laws that apply to other kinds of works, such as semiconductor masks.

"The Program" refers to any copyrightable work licensed under this License. Each license is addressed as "you". "Licensees" and "recipients" may be individuals or organizations.

To "modify" a work means to copy from or adapt all or part of the work in a fashion requiring copyright permission, other than the making of an exact copy. The resulting work is called a "modified version" of the earlier work or a work "based on" the earlier work.

A "covered work" means either the unmodified Program or a work based on the Program.

To "prongater" a work means to do anything with it that, without permission, would make you directly or secondarily liable for infringement under applicable copyright law, except executing it on a computer or modifying a private copy. Propagation includes copyring, distribution (with or without modification), making available to the public, and in some countries other activities as well.

To "convey" a work means any kind of propagation that enables other parties to make or receive copies. Mere interaction with a user through a computer network, with no transfer of a copy, is not conveying. An interactive user interface displays "Appropriate Legal Notices" to the extent that it includes a convenient and prominently visible feature that (1) displays an appropriate copyright notice, and (2) tells the user that there is no warranty for the work (except to the extent that warranties are provided), that Iconsess rany convey the work under this License, and how to view a copy of this License, and how to view a copy of this License. All the interface presents all st of user commands or options, such as a menu, a prominent item in the list meets this criterion.

1. Source Code.

The "source code" for a work means the preferred form of the work for making modifications to it. "Object code" means any non-source form of a work.

A "Standard Interface" means an interface that either is an official standard defined by a recognized standards body, or, in the case of interfaces specified for a particular programming language, one that is widely used among developers working in that language.

The "System Libraries" of an executable work include anything, other than the work as a whole, that (a) is included in the normal form of packaging a Major Component, but which is not part of that Major Component, and (b) serves only to enable use of the work with that Major Component, or to implement a Standard Interface for which an implementation is available to the public in source code form. A "Major Component," in this context, means a major essential component (kernel, window system, and so on) of the specific operating system (if any) on which the executable work runs, or a compiler used to produce the work, or an object code interpreter used to run it.

The "Corresponding Source" for a work in object code from means all the source code ended to generate, install, and (for a nescutable work) no the object code and to modify the work, including scripts to contret those activities. However, it does not include the work's System Ubraries, or general-purpose tools or generally available free programs which are used unmodified in performing those activities but which are only part of the work. For example, Corresponding Source includes inserface definition files associated with source files for the work, and the source code for shared libraries and dynamically linked subprograms that the work is specifiedly designed to require, such as by intimate data communication or control flow between those subprograms and other parts of the work.

The Corresponding Source need not include anything that users can regenerate automatically from other parts of the Corresponding Source. The Corresponding Source for a work in source code form is that same work.

2. Basic Permissions.

All rights granted under this License are granted for the term of copyright on the Program, and are invercoate provided the stated conditions are met. This License explicitly affirms your unlimited permission to run the unmodified Program. The output from running acovered work is covered by this License only if the output, given its content, constitutes a covered work. This License acknowledges your rights of fair use or required required to provide by copyright law.

You may make, run and corrospants covered works that you do not convex without

conditions so long as your license otherwise remains in force. You may convey covered works to others of the sole purpose of having them make modifications exclusively for you, or provide you with facilities for running those works, provided you out comply with the terms of this License in conveying all material for which you on not control copyright. Those thus making or running the covered works for you must do so exclusively no your behalf, under your direction and control, on terms that prohibit them from making any copies of your copyrighted material outside their relationships with your

Conveying under any other circumstances is permitted solely under the conditions stated below. Sublicensing is not allowed; section 10 makes it unnecessary.

3. Protecting Users' Legal Rights From Anti-Circumvention Law.

No covered work shall be deemed part of an effective technological measure under any applicable law fulfilling obligations under article 11 of the WIPO copyright treaty adopted on 20 December 1996, or similar laws prohibiting or restricting circumvention of such measures.

When you convey a covered work, you waive any legal power to forbid circumvention of technological measures to the extent such circumvention is effected by secretizing rights under this License with respect to the covered work, and you disclaim any intention to limit operation or modification of the work as a means of enforcing, against the work's users, your or third parties' legal rights to forbid circumvention of technological measures.

4. Conveying Verbatim Copies.

You may convey verballin copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice; keep intact all notices stating that this License and any non-permissive terms added in accord with section? Apply to the code; keep intact all notices of the absence of any warranty; and give all recipients a copy of this License along with the Program. You may charge alvey price on price for each copy that you correy, and you may offer support or warranty protection for a feet.

5. Conveying Modified Source Versions.

You may convey a work based on the Program, or the modifications to produce it from the Program, in the form of source code under the terms of section 4, provided that you also meet all of these conditions:

- a) The work must carry prominent notices stating that you modified it, and giving a relevant date.
- b) The work must carry prominent notices stating that it is released under this License and any conditions added under section 7. This requirement modifies the requirement in section 4.1 "Seen intert all notices"
- c) You must Icense the entire work, as a whole, under this License to anyone who comes into possession of a copy. This License will therefore apply, along with any appliciable section? additional terms, to the whole of the work, and all its parts, regardless of how they are packaged. This License gives no permission to Icense the work in any other way, but it does not invalidate such permission if you have separately received it.
- d) If the work has interactive user interfaces, each must display Appropriate Legal Notices; however, if the Program has interactive interfaces that do not display Appropriate Legal Notices, your work need not make them do so.
 A compilation of a covered work with other separate and independent works, which are not by their nature extensions of the covered work and which are not combined.

with it such as to form a larger program, in or on a volume of a storage or distribution medium, is called an "aggregate" if the compilation and its resulting copyright are not used to limit the access or legal rights of the compilation's users beyond what the individual works permit. Inclusion of a covered work in an aggregate does not cause this License to apply to the other person of the aggregate. The appropriate control is the support of the specific person of the sold person of the collect code, whose source code is excluded from the Corresponding Source as a System Library, need not benefulded in conveying the object code work.

A "User Product" is either (1) a "consumer product", which means any tangible personal properly which is normally used for personal, family, or household purposes, or (2) anything deslipted or sold for incorporation that a dweller, in the second of the composition of the dweller, in the second of the composition of the dweller, in the second of the composition of coverage. For a particular product received by a particular user, "normally used" refers to a lycical or common use of that class of product.

Installation Information' for a Lise Product means any methods, procedures, authorization levys, or other Information required to install and ascordam ordination and the product of the product of the product from a modified version of a covered work in that User Product from a modified version of its Corresponding Source. The Information must suffice to ensure that the continued functioning of the modified object code is in no case prevented or interfered with select because modification has been made.

regardless of the status of the particular user or of the way in which the particular

user actually uses, or expects or is expected to use, the product. A product is a

consumer product regardless of whether the product has substantial commercial,

industrial or non-consumer uses, unless such uses represent the only significant

mode of use of the product

If you convey an object code work under this section in, or with, or specifically for use in a User Product, and the conveying occurs as part of a transaction in which the right of possession and use of the User Product is transferred to the recipient in perpetuity of re a fixed term (regardetics of how the transaction is characteriscion is characteriscion is characteriscion in Corresponding Source conveyed under this section must be accompanied by the Corresponding Source conveyed under this section must be accompanied by the Corresponding Source conveyed under this section must be accompanied by the Corresponding Source conveyed under this section must be accompanied by the Corresponding Source conveyed under this section must be accompanied by the third party retains the ability to install modified object code on the User Product (for example, the work has been installed in RDM)

The requirement to provide Installation Information does not include a requirement conclinue to provide support service, warranty, or updates for a work that has been modified or installed by the recipient, or for the User Product in which it has been modified or installed by American the recipient, or for the User Product in which it has been modified or installed chaceas to a network may be denied when the modification is tagif materially and adversely affects be operation of the network or violates the register and revisions for communications across the network.

Corresponding Source conveyed, and Installation Information provided, in accord with this section must be in a format that is publicly documented (and with an implementation available to the public in source code form), and must require no special password or key for unpeaking, reading or copying.

7. Additional Terms.

*Additional permissions" are terms that supplement the terms of this License by making exceptions from one or more of its conditions. Additional permissions that are applicable to the entire Program shall be treated as though they were included in this License, to the extent that they are valid under applicable law. If additional permissions apply only to part of the Program, that part may be used separately under those permissions, but the entire Program remains governed by this License without regard to the additional permissions.

When you convey a copy of a covered work, you may at your option remove any additional permissions from that copy, or from any part of it. (Additional permissions may be written to require their own removal in certain cases when you modify the work.) You may place additional permissions on material, added by you to a covered work, for which you have or can give appropriate copyright permission. Notwithstanding any other provision of this License, for material you add to a covered work, you may (if authorized by the copyright holders of that material) supplement the terms of this License with terms:

- a) Disclaiming warranty or limiting liability differently from the terms of sections 15 and 16 of this License; or
- b) Requiring preservation of specified reasonable legal notices or author attributions in that material or in the Appropriate Legal Notices displayed by works containing
- c) Prohibiting misrepresentation of the origin of that material, or requiring that modified versions of such material be marked in reasonable ways as different from the original version; or
- d) Limiting the use for publicity purposes of names of licensors or authors of the material; or
- e) Declining to grant rights under trademark law for use of some trade names, trademarks, or service marks; or
- f) Requiring indemnification of licensors and authors of that material by anyone who conveys the material (or modified versions of it) with contractual assumptions of liability to the recipient, for any liability that these contractual assumptions directly impose on those licensors and authors.

If the Program as you received it, or any part of it, contains a notice stating that it is governed by this License along with a term that is a unther restriction, you may remove that term. If a license document contains a further restriction but permits reflecensing or conveying under this License, you may add to a covered work materia governed by the terms of that license document, provided that the further restriction does not survive such relicensing or conveying.

If you add terms to a covered work in accord with this section, you must place, in the

relevant source files, a statement of the additional terms that apply to those files, or a notice indicating where to find the applicable terms.

Additional terms, permissive or non-nermissive, may be stated in the form of a

acomional terms, permissive or non-permissive, may be stated in the form of a separately written license, or stated as exceptions; the above requirements apply either way.

8. Termination

You may not propagate or motify a covered work except as expressly provided under this License. Any attentor thereives to propagate or motify it is vival, and will automatically terminate your rights under this License (including any patient licenses granted under the third paragraph of section 11), however, (if you cosea all vival on of this License, then your leneme from a particular copyright holder schill is enimatated (a) provisionally, unless and unlit the copyright holder schill yand finally terminate your license, and (b) permanently, if the copyright holder falls to notify you of the violation by some reparagranter mans may not to 80 days after the cossation.

Moreover, your Losense from a particular copyrigh holder is reinstated permanently in the copyright holder is reinstated permanently in the copyright holder, notifies you of the volation by some measonable means, this is the first time you have received notice of violation of this License (for any word; from that copyrigh holder, and you care the violation prior to 3 days after your receipt of the notice. Termination of your rights under this section does not terminate the losenses of parties who have received copies or rights from you under this License. your rights have been terminated and not permanently reinstated, you do not qualify to serve the receiver and the properties of the pr

9. Acceptance Not Required for Having Copies.

You are not required to accept this License in order to receive or run a copy of the Program. Ancillary propagation of a covered work occurring solely as a consequence of using peer-to-peer transmission to receive a copy likewise does not require accentance. However, nothing other than this License grants you permission to propagate or modify any covered work. These actions infringe copyright if you do not accept this License. Therefore, by modifying or propagating a covered work, you indicate your acceptance of this License to do so.

10. Automatic Licensing of Downstream Recipients.

Each time you convey a covered work, the recipient automatically receives a license from the original licensors, to run, modify and propagate that work, subject to this License. You are not responsible for enforcing compliance by third parties with this

An "entity transaction" is a transaction transferring control of an organization, or substantially all assets of nor, or subdividing an organization, or merging organization. The organization is of the organization or supplied and transaction who receives a copy of the event also received swith several received in the organization of the event and or could give under the previous paragraph, but a right to possession of the Corresponding Source of the work from the predicessor in interest, if the predicessor has it or can get it with reasonable efforts, for una you change any further restrictions on the large of the previous paragraph, or una you can go any further restrictions on the large of the previous paragraph, and the previous paragraph, and the previous paragraph, and the previous paragraph, and the previous paragraph, or other charge for exercise or fights granted under this License, and you may not intitle liligation (inclinding a corsa-claim or counterclaim is a lineautil alleging that any patient claim is infringed by making, using, selling, offering for sale, or importing the Programm or any portion of it.

11. Patents.

A "contributor" is a copyright holder who authorizes use under this License of the Program or a work on which the Program is based. The work thus licensed is called the contributor's "contributor version". A contributor's "essential patient claims" are all patent claims wound or controlled by the contributor, whether already acquired or hereafter acquired, that would be infringed by some manner, permitted by this License, of making, using, or selling its contributor version, but do not include claims that would be infringed only as a consequence of further modification of the contributor version. For purposes of this definition, 'control' induced set his grant patent sublicenses in a manner consistent with the requirements of this License. Each contributor grants you a non-exclusive, worldwide, royalty-free patent license under the contributor's essential patent claims, to make, use, sell, offer for sale, import and otherwise run, modify and propagate the contents of its contributor version.

In the following three paragraphs, a "gatent license" is any express agreement or

commitment, however denominated, not to enforce a patent (such as an express permission to practice a patent or coverant not to sue for patent infirement). To "grant" such a patent license to a party means to make such an agreement or commitment not o enforce a patent against the party. If you convey a covered work, knowingly relying on a patent license, and the Corresponding Source of the work is not available for anyone to copy, free of charge and under the terms of this License, through a publicly available network server or other readily accessible means, then you make relief or I) cause the Corresponding Source of the such such that you have been applied to the control of the patent license for this particular work, or (5) arrange, in a martine crossistent with the requirements of this License, to odd the patent license for this particular work, or (5) arrange, in a martine reclusions. "Knowing relief" in the control of the patent license for the particular work, or (5) arrange, in a martine reclusions. "Knowing relief" in the patent license for the patent in the patent license for the patent in the patent license for the patent paten

If, pursuent to or in connection with a single transaction or arrangement, you convey or propagate by procuring conveyance of a covered work, and grant a patient loanse to some of the parties receiving the covered work authorizing them to use, propagate, modify or convey a specific copy of the covered work them the patient loanse you grant is automatically extended to all recipients of the covered work that works based on it.

A plater license is "descrimatory" if it does not include within the scope of its ownerage, prohibits the exercise of, or is conditioned on the non-exercise of one or more of the rights that are specifically granted under this License. You may not convey a covered work if you are a party to an arrangement with a little party that is in the business of distributing software, under which you make payment to the third party based on the extent of your activity of conveying the work, and under which the third party grants, to any of the parties who would receive the covered work from you, a discriminatory patent license (a) in connection with propie of the covered work conveyed by you (or copies made from those copies), or (b) primarily for and in connection with specific products or complations that contains the covered work, unless you entered into that arrangement, or that patent license was granted, prior to 28 March 2007.

Nothing in this License shall be construed as excluding or limiting any implied license or other defenses to infringement that may otherwise be available to you under applicable patent law.

12. No Surrender of Others' Freedom.

If conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this cliennes, they do not occuse you from the conditions of this License. If you cannot convey a covered work so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not convey it at all. For example, if you agree to larm that obligate you to solve at next your further conveying from those to whom you convey the Program, the only way you could satisfy both those terms and this License would be to ferfine entirely from conveying the Program.

13. Use with the GNU Affero General Public License.

Notwithstanding any other provision of this License, you have permission to like or combine any covered work with a work licensed under servain 3 of the GNU Affero General Public License into a single combined work, and to convey the resulting work. The terms of this License will continue to apply to the part which is the covered work, but the special requirements of the GNU Affero General Public License, seation 15, concerning interaction through a network will apply to the

14. Revised Versions of this License.

The Free Software Foundation may publish revised and/or new versions of the GNU General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or

Each version is given a distinguishing version number. If the Program specifies that a certain numbered version of the GNU General Public Licenser for any later version' applies to it, you have the option of following the terms and conditions either of that numbered version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of the GNU General Problet License, you may choose any version ever published by the

If the Program specifies that a proxy can decide which future versions of the GNU General Public Leanse can be used. Hat proxy's public statement of acceptance of a version permanently authorizes you to choose that version for the Program. Later license versions may give you additional or different permissions. However, no additional obligations are imposed on any author or copyright holder as a result of your choosing to follow a later version.

15. Disclaimer of Warranty.

THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW, EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS ANDOR OTHER RAPITES PROVIDE THE PROGRAM AS IS WITHOUT WARRANTY OF ANY INDI, EITHER EXPRESSED OR IMPLED, INCLUDING, BUT NOT LIMITED TO, THE IMPLED EXPRESSED OR IMPLED, INCLUDING, BUT NOT LIMITED TO, THE IMPLED PROGRAMS OF MERCHANTABLITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM WITH YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR.

16. Limitation of Liability

IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WIRTING WILL AND COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MODIFIES AND/OR CONVEYS THE PROGRAM AS PERMITTED ABOVE, BE LEABLE TO YOU FOR DAMAGES, ROLLUMIS ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARBINING UT OF THE USE OR NABILITY TO USE THE PROGRAM (INCLUDING BUT FOR UTILITY OF THE USE OF DATA OR DATA BEING REINDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THEN PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS, EVEN F SUCH HOLDER OR OTHER PROGRAMS.

17. Interpretation of Sections 15 and 16.

If the disclaimer of warranty and limitation of liability provided above cannot be given local legal effect according to their terms, reviewing courts shall apply local are that most closely approximates an absolute waiver of all civil aliability in connection with the Program, unless a warranty or assumption of liability accompanies a cover of the Program in return for a cover

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs? If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms. To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively state the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

6. Conveying Non-Source Forms.
